

The rugged solution for tough situations!

**Einhell**®

**NEW GENERATION**

Powerful and robust stainless steel submersible pump to empty garden ponds, flooded basements and construction sites. It takes foreign particles up to Ø 25 mm in size. In addition to its typical use in excavation pits, this pump is particularly suitable for emptying garden ponds and swimming pools. **Universally controlled ON/OFF switching height and operation differential via continuously adjustable float switch.** The float switch can also be fixed during continuous operation. One of the advantages of these new generation pumps is their carrying handle with integrated cable reel for proper storage and transport.
