

Fountain Pump TP 5002

Art.-No.: **41.724.62**

bar code: **4006825416381**

sales unit: **4 pcs**

This powerful submersible pond pump assists you in obtaining a good water quality and cares for the right amount of oxygen in the water. It is an eye-catching device in your garden pond or artificial brooklets. The pump is designed for permanent use under water. A major attention was given to the maximum output with an economical current consumption. The pump is powered by an oil-less motor with the stator completely sealed-in and water-cooled permanent magnet rotor. The housing is made of impact resistant plastics.

Features:

- Suction filter with BIOCELL-filter insert (1)
- 10 m mains cable with earth plug (without picture)
- jet fountainhead (2)
- connector for waterspout (3) with flow control (4)
