Submersible pressure pump

Art.-No. 41.709.64

The robust submersible pressure pump is most suitable for delivery of clear water from reservoir, well and shafts. The deep well pump is also able to pump the water up from large depths and because of the multi-stage rotor-system the water can be transfer with much pressure. The integrated motor-thermo protection protects the pump against overloading. The vertical pressure line connection consists of stainless steel and has an approx. 33.3 mm (G1) female thread.

Features

- Robust pressure connection with stainless steel insert
- 2 ring bolts
- Pump housing consist of rust-free stainless steel
- Float switch
- 3 high quality plastic pump wheels
- High quality floating seal
