WW 2000 I Wave Heater

Art.-No. 23.384.30

The mobile wave heater WW 2000 I does not warm up air dimensions, but warms up firm bodies in the area were they strike onto with the radiated warming waves. The heat waves make a comfortable heat feeling without overheating the room and without production of air turbulences. The waves convert approx. 90% of its energy in direct and long-waved heat rays and therefore it is very economical. The wave heater is very silent and reaches the maximum heating radiation very fast. It does not disperse dust and is therefore very suitable for people with breathing difficulties, allergic persons and homes with children.

The negative ions produced by the ionizer determine themselves to bad, positively charged particles and neutralize them by making them heavier and voluminous. The bad particles floating no longer in the air, so the air is significantly clearer. The wave heater can also be mounted on walls.

Advantages compared to traditional electric heatings:

- An additional moistening of the room air because of the heating is not necessary
- The room temperature can be lowered by almost 2 degrees and retain the same feeling of comfortable warmth
- Universal applicable in living rooms
- Attaining very quickly the highest heat reflection

Features

- LED display (1)
- Plastic-metal grid housing (2)
- 2 feet (3)
- Power switch
- Electronic thermostat (5° bis 36°)
- Key switch with two heat-settings (1.200 W / 2.000 W)
- Electronic clock timer (1 – 24 h)
- Ionizer
- Remote control (4)
- Tilting protection (switches off during tilting)
- Wall fastening possible

Technical data

- Mains: 220 – 240 V ~ 50 Hz
- Heating power: 2,000 watts
- Protection class: IP X0
- Product weight: 5.6 kg

Logistic data

- Net weight: 5.7 kg
- Gross weight: 7.38 kg
- Packing dimensions: 830 x 106 x 625 mm
- Bar code: 4006825 583243
- Sales unit: 1 pc
