MAINTENANCE

WARNING! BEFORE CLEANING OR CARRYING OUT ANY MAINTENANCE PROCEDURE, ENSURE THAT THE BATTERIES HAVE BEEN REMOVED.

Cleaning

- Keep the ventilation slots of the tool clean at all times to ensure efficient operation.
- After each use, blow air through the tool housing to ensure it is free from all dust, dirt, etc. Build up of dust or dirt particles may cause the tool to overheat and shorten the life of the tool.
- If the housing of the tool requires cleaning, do not use solvents. Use of a cloth only is recommended.
- Never allow any liquid to get inside the tool, never immerse any part of the tool into liquid.

Storage

When not in use, the tool should be stored in a dry, frost free location, keep out of children's reach.

Note: Ozito Industries will not be responsible for any damage or injuries caused by repair of the tool by an unauthorised person or by mishandling.

ELECTRICAL SAFETY

WARNING! When using electric tools basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury. Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool. Save these instructions and other documents supplied with this tool for future reference.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- This appliance is compatible and only to be used with all batteries & chargers from the Ozito PXC range.
- Refer to the PXC battery and charger manuals for information regarding charging, use and storage.

WARNING! Always remove the battery from the tool:

-when the batteries are to be charged,
-when the tool is left unattended,
-when the tool is being checked, cleaned, or having maintenance work done,
-when the tool is to be stored,
or if the tool vibrates abnormally.
-Do not combine different types of batteries or new and used batteries.
-Do not use modified or damaged batteries.

GENERAL POWER TOOL SAFETY WARNINGS

WARNING! Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety

a) **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.

b) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.

c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) Electrical safety

a) **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.

b) **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.

c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.

d) **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.

e) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

3) Personal safety

a) **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.

b) **Use personal protective equipment. Always wear eye protection.** Protective equipment such as a dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.

c) **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.

f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.

g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

h) **Do not let familiarity gained from frequent use of tools allow you to become complacent and ignore tool safety principles.** A careless action can cause severe injury within a fraction of a second.

4) Power tool use and care

a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.

b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) **Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.

e) **Maintain power tools and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

h) **Keep handles and grasping surfaces dry, clean and free from oil and grease.** Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.

5) Battery tool use and care

a) **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.

b) **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.

c) **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.

d) **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

e) **Do not use a battery pack or tool that is damaged or modified.** Damaged or modified batteries may exhibit unpredictable behaviour resulting in fire, explosion or risk of injury.

f) **Do not expose a battery pack or tool to fire or excessive temperature.** Exposure to fire or temperature above 130 °C may cause explosion.

g) **Follow all charging instructions and do not charge the battery pack or tool outside the temperature range specified in the instructions.** Charging improperly or at temperatures outside the specified range may damage the battery and increase the risk of fire.

6) Service

a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

b) **Never service damaged battery packs.** Service of battery packs should only be performed by the manufacturer or authorized service providers.

WORKLIGHT SAFETY WARNINGS

WARNING! This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety

- Place the tripod on firm ground and ensure the base of the tripod is as wide as possible to prevent the worklight from tipping over during use. Weigh down the base of the tripod with sandbags for extra stability if necessary
- Do not use light outdoors
- Do not leave the light unattended when in use.
- Do not store the product in damp or wet locations, or in a location where the temperature may reach or exceed 40°C (104°F). For example, inside sheds, vehicles or metal buildings in the summer.
- Do not use the luminaire in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.
- Do not cover or clog the luminaire with cloth or carton, etc. Covering or clogging it may cause a flame. If wrapped or in contact with fabrics, the luminaire can produce sufficient hear to melt some fabrics. To avoid serious personal injury, never allow the luminaire to come in contact with anything.
- Do not operate if worklight is broken.
- Do not use this product if it is not completely assembled or if any parts appear to be missing or damaged. Use of a product that is not properly and completely assembled or with damaged or missing parts could result in serious personal injury.
- Do not attempt to modify this product or create accessories or attachments not recommended for use with this product. Any such alterations or modifications is considered misuse and could result in a hazardous condition leading to possible serious personal injury.
- Do not direct the light beam at persons or animals and do not stare directlu into the light beam yourself (not even from a distance). Staring into the light beam amy result in serious injury or vision loss.
- Always tighten fastening knobs after performing adjustments to prevent the worklight from shifting unexpectedly.
- Do not place hands or fingers between adjustable head and frame when positioning the worklights to avoid pinching your fingers or hands.
- When the luminaire is not in use, always switch off and remove the battery from the luminaire.
- Do not leave the light on while unattended. Failure to follow these instructions could result in serious personal injury.
- Do not expose worklight to liquids, rain or snow. If exposed to liquid, switch the light off immediately by disconnecting the power supply (only if safe to do so). Let the light completely dry before attempting to switch on again. Do not wash it in water.
- Do not handle tool with wet hands or on wet surfaces.

WARRANTY

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law.

Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

5 YEAR REPLACEMENT WARRANTY

Your Product is guaranteed for a period of 60 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. **Lithium Ion batteries and chargers are covered by a 36 month warranty** and are excluded from the warranty extension. Warranty excludes consumable parts.

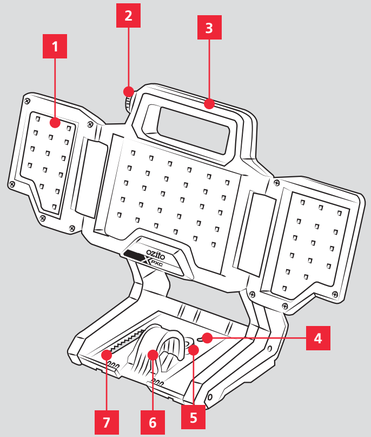

OZITO 25 Fox Drive, Dandenong South, VIC 3175, Australia.

BATTERY & CHARGER

This tool is compatible with all batteries & chargers from the Ozito PXC range.

ONLINE MANUAL

Scan this QR Code with your mobile device to take you to the online manual.

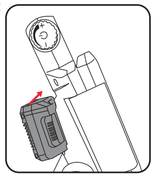

SETUP & PREPARATION

1. FITTING THE BATTERY

IMPORTANT! THE LIGHT SOURCE OF THIS LUMINAIRE IS NOT REPLACEABLE; WHEN THE LIGHT SOURCE REACHES ITS END OF LIFE THE WHOLE LUMINAIRE SHALL BE REPLACED.

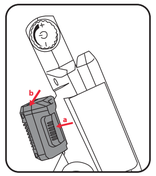

Installing The Battery Pack

1. Slide the battery into the tool base until it clicks into place.

Removing The Battery Pack

1. Hold down the battery release button (a) and then slide the battery out.(b)

2. ASSEMBLY

WARNING! ENSURE THE TOOL IS SWITCHED OFF AND THE BATTERY IS REMOVED BEFORE PERFORMING ANY OF THE FOLLOWING TASKS.

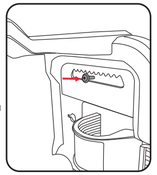

WARNING! MOUNTING/HANGING SPOT CAN NOT ENDANGERING PERSONS, ANIMALS AND SURROUNDINGS.

Attaching To A Wall

The wall mount bracket and the additional wall mount bracket on the worklight allows you to hang the unit on a wall.

Use the appropriate screw type for the surface you are attaching the bracket to a wall. The recommended screw size is 3.5mm in diameter and at least 50mm long.

1. Fasten a screw halfway into the wall at the desired height.

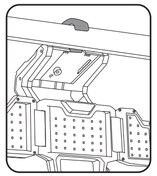

2. Place the groove of the mounting plate on the screw and fasten the screw fully into the wall.
3. For extra security, place another screw through the hole in the mounting plate.

Using the Hanging Hook

Where appropriate, the worklight can also be hung up with the supplied hook.

Note: Ensure the hook is placed securely around the mounting bar.

Note: Do no mount/hang the worklight higher than 3m ground height.

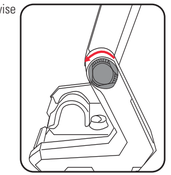

Note: The worklight is designed for indoor use only.

3. ADJUSTING THE WORKLIGHT

WARNING! ENSURE THE TOOL IS SWITCHED OFF AND THE BATTERY IS REMOVED BEFORE PERFORMING ANY OF THE FOLLOWING TASKS.

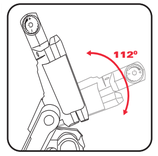

Changing The Light Direction

1. Rotate the adjustment knob anticlockwise to loosen the fan head.

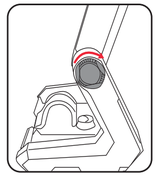

2. Adjust the worklight head to your desired angle before tightening it.

Note: Do not overturn more than 112° at common practice.

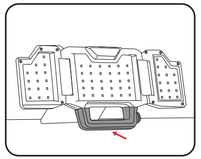

3. Rotate the adjustment knob clockwise to tighten the fan head after the desired head angle.

Note: Ensure that the worklight is placed on a flat surface and that it does not tip over.

Caution: Weight distribution may shift by adjusting worklight head more than 112°. In certain circumstances, the carry handle can provide necessary support to prevent tipping over. The worklight be used safely with the carry handle fully supported.

Note: Do not overtighten the adjustment knobs

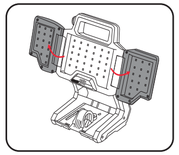

Note: By completely loosening the adjustment knob, you can even detach the worklight panels from the legs.

Note: For best adjustable angle practice, the worklight should be used with a tripod (sold separately).

Adjusting the 2 Side Panels

The panels can be adjusted according to your area of use.

Open up the side panels and adjust the angles horizontally to suit your application.

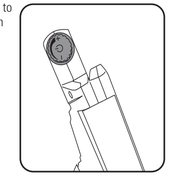

OPERATION

4. CONTROLS

WARNING! DO NOT TURN ON WORKLIGHT WHEN PANEL IS CLOSED. THAT MAY CAUSE WORKLIGHT OVERHEAT.

Turning The Worklight On & Off

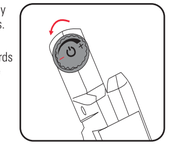

1. Press the dimming control swicth once to turn the worklight on and press it again to switch it off.

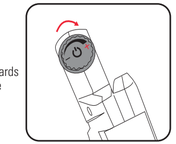

Dimming Controls

The brightness of the lamp is continuously adjustable to suit individual requirements.

1. Rotate the dimming control knob towards the (- sign) anticlockwise to reduce the brightness.

2. Rotate the dimming control knob towards the (+ sign) clockwise to increase the brightness.

5 YEAR REPLACEMENT WARRANTY
