

⚠ Important!

When using equipment, a few safety precautions must be observed to avoid injuries and damage. Please read the complete operating manual with due care. Keep this manual in a safe place, so that the information is available at all times. If you give the equipment to any other person, give them these operating instructions as well.

We accept no liability for damage or accidents which arise due to non-observance of these instructions and the safety information.

1. Safety regulations

The corresponding safety information can be found in the enclosed booklet.

⚠ Warning!

Read all safety regulations and all instructions.

Failure to follow the warnings and instructions may result in electric shock, fire and/ or serious injury.

Save all warnings and instructions for future reference.

2. Layout (Fig. 1)

1. ON/OFF switch
2. Tool chuck
3. Dust extraction adapter
4. Speed controller
5. Allen key for changing tools
6. Dust extraction device
7. Scraper
8. Triangular sanding/grinding plate
9. Metal saw blade
10. HSS saw blade

3. Items supplied

- Open the packaging and take out the equipment with care.
- Remove the packaging material and any packaging and/or transportation braces (if available).
- Check to see if all items are supplied.
- Inspect the equipment and accessories for transport damage.
- If possible, please keep the packaging until the end of the guarantee period.

IMPORTANT

The equipment and packaging material are not toys. Do not let children play with plastic bags, foils or small parts. There is a danger of swallowing or suffocating!

- Original operating instructions
- Safety information
- Multifunction tool
- Triangular sanding/grinding plate
- Scraper
- Allen key
- Sanding/grinding paper (6x)
- HSS saw blade
- Metal saw blade
- Dust extraction adapter
- Dust extraction device

4. Proper use

The equipment is designed for the sanding/grinding of wood, iron, plastic and similar materials using the appropriate sanding/grinding paper. Furthermore, the equipment is intended for sawing wood, plastic and similar materials, as well as scraping off glued carpets, filling compound residues, old paint and similar applications.

The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

5. Technical data

Mains voltage:	230 V ~ 50 Hz
Power input:	200 W
Idling speed:	15000-21000 rpm
Sanding/grinding area:	90 x 90 x 90 mm
Oscillation angle:	3°
Protection class:	II / 
Weight:	1.2 kg

GB

Sound and vibration

Sound and vibration values were measured in accordance with EN 60745.

L_{pA} sound pressure level	82.5 dB(A)
K_{pA} uncertainty	3 dB
L_{WA} sound power level	93.5 dB(A)
K_{WA} uncertainty	3 dB

Wear ear-muffs.

The impact of noise can cause damage to hearing.

Total vibration values (vector sum of three directions) determined in accordance with EN 60745.

Handle

Vibration emission value $a_h = 4.212 \text{ m/s}^2$

K uncertainty = 1.5 m/s^2

Additional information for electric power tools

Warning!

The specified vibration value was established in accordance with a standardized testing method. It may change according to how the electric equipment is used and may exceed the specified value in exceptional circumstances.

The specified vibration value can be used to compare the equipment with other electric power tools.

The specified vibration value can be used for initial assessment of a harmful effect.

Keep the noise emissions and vibrations to a minimum.

- Only use appliances which are in perfect working order.
- Service and clean the appliance regularly.
- Adapt your working style to suit the appliance.
- Do not overload the appliance.
- Have the appliance serviced whenever necessary.
- Switch the appliance off when it is not in use.
- Wear protective gloves.

Residual risks

Even if you use this electric power tool in accordance with instructions, certain residual risks cannot be ruled out. The following hazards may arise in connection with the equipment's construction and layout:

1. Lung damage if no suitable protective dust mask is used.
2. Damage to hearing if no suitable ear protection is used.
3. Health damage caused by hand-arm vibrations if the equipment is used over a prolonged period or is not properly guided and maintained.

6. Before starting the equipment

- Before you connect the equipment to the mains supply make sure that the data on the rating plate are identical to the mains data.
- Always pull the power plug before making adjustments to the equipment.

6.1 Fitting the plug-in tools (Figures 1/2/3)

- To fit the plug-in tools safely you should hold the multifunction tool so that the ON/OFF switch (1) points down and the tool mounting (2) faces up.
- Place the plug-in tool (e.g. the triangular sanding/grinding plate) on the tool mounting (2) so that the pins of the tool mounting (2) fit into the recesses in the plug-in tool.
- Secure the plug-in tool using the supplied screw (b) and tighten the screw securely with the Allen key (9).
- Make sure that the washer (a) is used for the screw (b) only in connection with the saw blade and the scraper (see Figure 3). In this case the corrugated face of the washer must be placed against the plug-in tool.

Check that the plug-in tool is secure.

6.2 Triangular sanding/grinding plate

Fit the triangular sanding/grinding plate to use the equipment as a delta sander/grinder.

6.2.1 Fastening the sanding/grinding paper

The Velcro fastener enables easy changing of sanding/grinding paper. Make sure that the vacuum extraction holes on the sanding/grinding paper and the sanding/grinding disk are aligned.

6.3 Fitting the dust extraction device (Fig. 4/5)

The dust extraction system prevents the accumulation of dirt and high dust loads in the air, and it makes it easier to dispose of the dust.

- Place the equipment in a stable position as shown in 6.1.
- Fit the dust extraction device (6) with the tool mounting (2) positioned as shown in Figure 4.
- Fasten the dust extraction device (6) by latching it

in the air vents.

- Connect the extractor adapter (3) to the dust extraction device (6). Make sure that the arrow (a) on the extractor device coincides with the recess (b) on the dust extraction device (6) (see Fig. 5). Turn the extractor adapter (3) anti-clockwise until it engages..
- Connect your tool to an extraction unit or vacuum cleaner. This will provide excellent extraction of chips and dust from the workpiece.

The benefits are that you will protect both the equipment and your own health. Your work area will also be clean and safe.

7. Starting up (Fig. 6)

7.1 Switching on/off

Slide the switch (1) forwards to switch on the equipment.

7.2 Practical tips

- Switch on the equipment.
- Work away from the body.
- Never move your hands into the direct vicinity of the work area.
- Use only plug-in tools which are in good working order and undamaged.

7.2.1 Plug-in tools

Sawing: Sawing wood and plastic.

Notes on working practice: When sawing, watch out for foreign bodies in the workpiece and remove these if necessary. Plunge cutting is allowed only in soft materials such as wood or plasterboard.

Sanding/grinding: Surface sanding/grinding at edges, in corners or hard-to-reach areas. Depending on choice of sanding/grinding paper for the sanding/grinding of wood, paint, lacquer, etc.

Notes on working practice: This equipment offers particularly high performance for the sanding/grinding of hard-to-reach corners and edges. To sand/grind profiles and channels you can also work with just the tip or the edge of the sanding/grinding disk. Various sanding/grinding papers are available, specially designed for the different types of material you may be working on and the amount you wish to remove from the surface. The amount removed will depend largely on the choice of sanding/grinding paper and pressure applied to the sanding/grinding disk.

Scraping: Scraping off old paint or adhesives.

Notes on working practice: Move the plug-in tool against the area you want to remove. Begin with a flat angle of incidence and little pressure. The surface (e.g. wood, plaster) may be damaged if too much pressure is used.

7.3 Speed control (Fig. 6)

You can select the speed by turning the speed controller (4).

Plus direction: Higher speed

Minus direction: Lower speed

8. Replacing the power cable

If the power cable for this equipment is damaged, it must be replaced by the manufacturer or its after-sales service or qualified electrician to avoid danger.

9. Cleaning, maintenance and ordering of spare parts

Always pull out the mains power plug before starting any cleaning work.

9.1 Cleaning

- Keep all safety devices, air vents and the motor housing free of dirt and dust as far as possible. Wipe the equipment with a clean cloth or blow it with compressed air at low pressure.
- We recommend that you clean the device immediately each time you have finished using it.
- Clean the equipment regularly with a moist cloth and some soft soap. Do not use cleaning agents or solvents; these could attack the plastic parts of the equipment. Ensure that no water can seep into the device. The ingress of water into an electric tool increases the risk of an electric shock.

9.2 Carbon brushes

In case of excessive sparking, have the carbon brushes checked only by a qualified electrician. Important! The carbon brushes should not be replaced by anyone but a qualified electrician.

9.3 Maintenance

There are no parts inside the equipment which require additional maintenance.

GB

9.4 Ordering replacement parts:

Please quote the following data when ordering replacement parts:

- Type of machine
- Article number of the machine
- Identification number of the machine
- Replacement part number of the part required

For our latest prices and information please go to www.einhell.com.au

10. Storage

Store the equipment and accessories out of children's reach in a dark and dry place at above freezing temperature. The ideal storage temperature is between 5 and 30 °C. Store the electric tool in its original packaging.

11. Disposal and recycling

The unit is supplied in packaging to prevent its being damaged in transit. This packaging is raw material and can therefore be reused or can be returned to the raw material system.

The unit and its accessories are made of various types of material, such as metal and plastic. Defective components must be disposed of as special waste. Ask your dealer or your local council.
