

AWG-964 140 Amp Arc Welder

FEATURES & BENEFITS

| | | |
|----------|--------------------------------|---|
| 1 | Current regulating knob | Adjusts current flow and enables use of 2.0 - 2.5mm electrodes. |
| 2 | Fan cooled | Cools unit and prolongs life and useability of unit. |
| 3 | Carry handle | Easy to manoeuvre and carry and transport the unit. |
| 4 | Face mask | For viewing while welding and protects user from flash. |
| 5 | Electrode holder | Secures welding rods and allows user to perform welds. |
| 6 | Wire brush/slag hammer | Cleaning welds and provides a cleaner finish. |
| 7 | Earth clamp | Completes circuit and allows user to perform welds. |

OTHER SPECIFICATIONS

| | |
|-----------------------------|-------------------|
| Welding capacity | 2.0 to 3.2mm Rods |
| Welding current | 55 – 130 Amps |
| Peak current | 140 Amps |
| Duty cycle | 25% @ 80 Amps |
| Overload LED indicator | Yes |
| Thermal overload protection | Yes |
| Max no load voltage | 48 Volts |
| GS & EMC Approved | Yes |
| Weight | 13.5 Kg |
| | |
| | |
| | |

STANDARD EQUIPMENT

| |
|-------------------------------------|
| Combination wire brush and chipping |
| Welding mask |
| |

RELATED ACCESSORIES

| |
|------------------------------------|
| Can be used with 2.0 to 3.2mm rods |
