

The automatic domestic water system has a 1,050W power rating and a practical intake & water fill indicator plus a large water filler and water drain screw to enable it to be made safe from frost. For checking the amount of dirt in the coarse filter at-a-glance, there is a dirt indicator. The flow sensor is equipped with an LED display. The automatic system is protected from damage by a range of safeguards, incl. the dry-run safeguard and a scald protection facility, thermostatic switch and a coarse filter with non-return valve. The high-quality intake and pressure connectors are made of metal. In addition, the automatic domestic water system has an additional second pressure connector and high-grade mechanical seals.
