BG-DW 1300 N Deep Well Pump

Art.-No. 41.709.42

The robust deep well pump is most suitable for delivery of clear water from reservoir, well and shafts. The deep well pump is also able to pump the water up from large depths and because of the multi-stage rotor-system the water can be transfer with much pressure. The integrated motor-thermo protection protects the pump against overloading. The pump is equipped with an external switching box and a 22 meter long connecting cable. The vertical pressure line connection with an integrated return valve consists of brass and has a G 1 ½ (47.8 mm) female thread.
