This "power station" provides energy and gives security.

Electricity flows, when it is needed. Power failures or insufficient current supply are no more a problem; whether during camping, at building sites, in homes or cottages, on boats or in the garden. This equipment is nearly applicable everywhere and offers with its continuous power of 2800 watts sufficient performance for many applications. The large 25 litre tank ensures continuous operation for 14 hours at 2/3 load. The power generator is powered by a high-quality 4-stroke engine and is equipped with overload switch.
