BT-VT 100 Voltage Transformer

Art.-No. 20.690.30

The Voltage Transformer produces a 230 V AC voltage in modified, cascaded sinus form of a 12 V DC battery voltage. The 12 V DC connection is made by the cigarette lighter in your car. A socket is available for the 230 V AC output voltage. The Voltage Transformer is suitable for the operation of different equipment up to max. 100 watts of capacity like e.g. notebook, radio, game console, CD/DVD – player, lighting etc. The item can also be used as 230 V power supply unit for battery chargers of digital cameras, mobile phones etc. The unit is not suitable for capacitive consumer load, controls and regulations.

Features

- Spiral cable (1) with cigarette lighter plug (2) and 15 A protection
- 1 x 230 V socket (3)
- Overload protection
- Short-circuit protection
- Battery cut-off at low input voltage
- Optical and acoustic failure alert

Technical Data

- | | |
|------------------------------|-------------------------------|
| ■ Continuous power max.: | 100 W |
| ■ Temporary power (~ 25 ms): | 200 W |
| ■ Output voltage: | 230 V |
| ■ Frequency: | 50 Hz
modified sinus curve |
| ■ Range of input voltage: | 10 – 15 V |
| ■ Battery cut-off: | 10 V +/- 0.5 V d.c. |
| ■ Range of operation: | 0°C - +40°C |
| ■ Net weight: | 0.55 kg |
| ■ Gross weight: | 0.7 kg |
| ■ Packing dimensions: | 120 x 82 x 240 mm |
| ■ Bar code: | 4006825562309 |
| ■ Sales unit: | 10 pcs |
