RT-PG 5000 DD

Power Generator

Tank capacity 16 Litres

This "power station" supplies energy and provides security.

Power will be available whenever it is needed. Power failures or insufficient current supply are no longer a problem; whether during camping, at building sites, in homes or cottages, on boats or in the garden. This equipment can be used nearly everywhere, and, with its continuous power supply of 4,400 watts, provides sufficient power for many applications. The large 16-litres tank ensures continuous operation for twelve hours at 2/3 load. The power generator is powered by a high-quality diesel engine and is equipped with an overload switch. With this power generator you are optimally equipped, regardless if it should be powered with 12 V, 230 V or 400 V. With the economically diesel engine is the RT-PG 5000 DD a cheap alternative to petrol driven power generators.
