The RT-TS 1725 U table saw has been designed for stationary and mobile application. The easy-to-install table extensions provide a large work surface. The RT-TS 1725 U has been designed for multi-purpose applications: ripping and crosscuts of lumber, chipboard, plywood, multiplex board, veneered board and plastics. The table saw is very quiet and smooth running. Its compact design, ease of handling during transport and its powerful performance make it also ideal for outdoor use, e.g. at construction sites and for interior decorating work. The saw can be tilted up to 45° for mitre cuts.
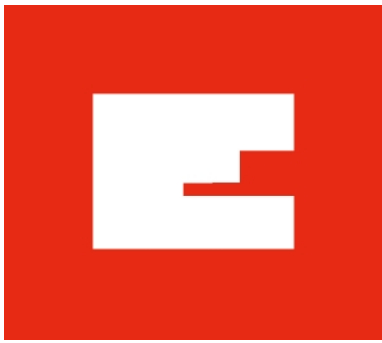

The sturdy underframe turns the table saw into a sturdy stand-alone saw which can be used at optimum working heights.
