

Einhell

ACCESSORY

Tiller Accessory

Kartoffelpflug

Item No.: 3431530

Ident No.: 21011

Bar Code: 4006825663426

The original Einhell potato plough is an accessory for motor tilling and is especially suitable for the Einhell petrol ground tiller GC-MT 4280. If the potato plough is to be used with the petrol ground tiller, the blade is first disassembled so that the two wheels included in delivery of the ground tiller can be attached instead. The plough is then mounted where the brake spur otherwise sits during the use of the blade. This means that the petrol ground tiller can be used for the potato harvest by uncovering the rows of potatoes in your vegetable patch. The potato plough is made of robust steel and weighs 5.83 kg.

Features & Benefits

- Original Einhell potato plough for petrol ground tiller
- Motor tiller accessories
- Suitable for the Einhell petrol ground tiller GC-MT 4280
- Potato plough for harvesting potatoes
- Sturdy steel potato plough
- Weight: 5.83 kg
