

Aluminium Green House Starline II

Art.-No.: 36.513.18

Bar code: 4006825573459

Sales unit: 1 pc

Due to the fact that the green house (2-panels – single door) was statically properly calculated aluminium profiles, you don't need any crosswise installing wind bonds. The individual parts which must be installed are limited to a minimum. A patent-registered connecting system, fixed connection points and the pre-assembled door window reduce the assembling time significantly. Heat insulating, full-page from aluminium profiles bordered 4 mm sheets made of polycarbonate offers an optimal climate in the green house.

It is recommended to embody the green house with one aluminium stand and 4 pcs of ground anchors (are available as accessory) in the ground. Alternatively it can be installed also onto a wall or a concrete stand. The national customary building regulation is to be considered.

The greenhouse is snow load tested with 50 kg/m² and wind load tested with 25 kg/m².

Features:

- High strength, statically properly calculated aluminium profiles for an optimal reinforcement of geometry
- Patent-registered connecting system
