

# GC-CT 18/2411 Li P

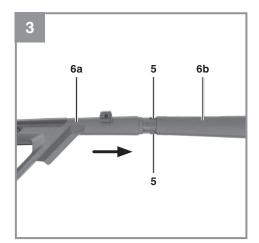

EN Original operating instructions Cordless lawn trimmer

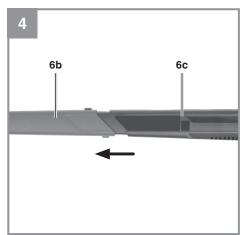

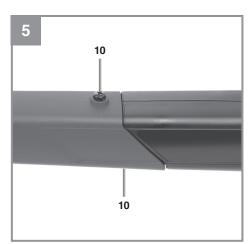

Art.-Nr.: 34.133.07 I.-Nr.: 21015

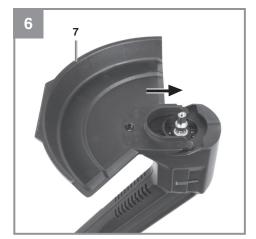

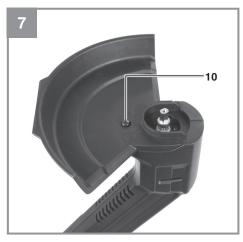

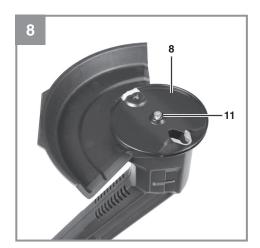

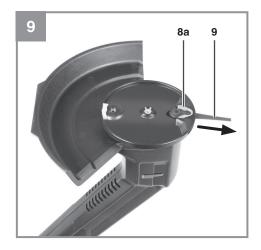

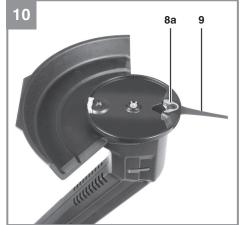

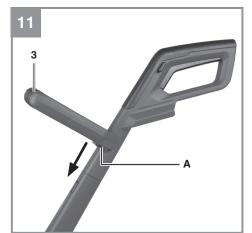

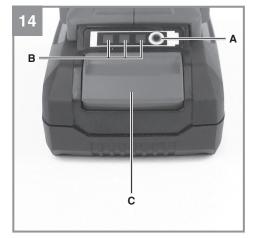

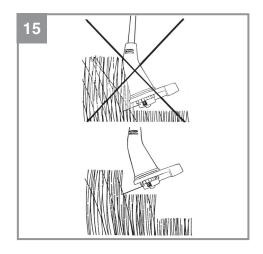

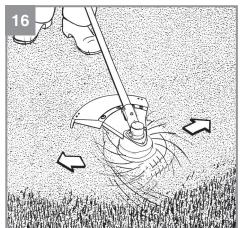

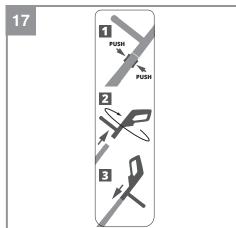

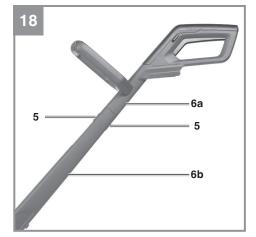

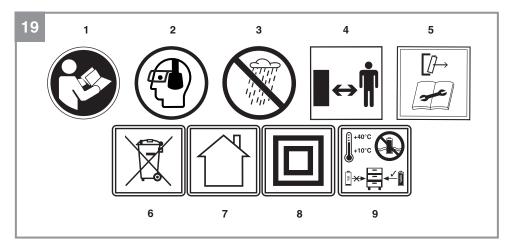

#### Danger!

When using equipment, a few safety precautions must be observed to avoid injuries and damage. Please read the complete original operating instructions and safety information with due care. Keep these operating instructions in a safe place so that the information is available at all times. If you give the equipment to any other person, hand over these original operating instructions and the safety information as well. We cannot accept any liability for damage or accidents which arise due to failure to follow these instructions and the safety information.

# Explanation of the warning signs on the tool (see Fig. 19)

- 1. Read the instruction manual before starting!
- 2. Wear goggles and ear muffs!
- Do not use the tool in the rain or under wet conditions. If water gets inside the tool this will increase the risk of an electric shock or malfunction and can lead to injuries.
- 4. Keep other people out of the danger area!
- Warning! Remove the battery before working on the tool.
- 6. Dispose of batteries correctly
- 7. For use in dry rooms only
- 8. Safety class II
- Store the battery only in dry rooms with an ambient temperature of +10°C to +40°C.
   Place only charged batteries in storage (charged at least 40%).

#### 1. Safety information

The corresponding safety information can be found in the enclosed booklet.

#### WARNING

Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

This equipment is not allowed to be used by children. Children should be supervised so that they do not play with the equipment. Children are not allowed to carry out the cleaning or maintenance. This equipment is not allowed to be used by people with limited physical, sensory or mental capacities or by those with insufficient knowledge

or experience unless they are supervised or instructed by a person who is responsible for them.

# 2. Layout and items supplied

### 2.1 Layout (Fig. 1/2)

- 1. Safety lock-off
- 2. On/Off switch
- 3. Additional handle
- 4. Battery mount
- 5. Locking knob for edge trimming mode
- 6. Long trimmer handle
- 7. Guard hood
- 8. Blade plate
- 9. Blade
- 10. Assembly screw (3 pcs)
- 11. Blade plate fastening screw
- 12. Motor shaft
- 13. Battery pack
- 14. Charger

#### 2.2 Items supplied

Please check that the article is complete as specified in the scope of delivery. If parts are missing, please contact our service center or the sales outlet where you made your purchase at the latest within 5 working days after purchasing the product and upon presentation of a valid bill of purchase. Also, refer to the warranty table in the service information at the end of the operating instructions.

- Open the packaging and take out the equipment with care.
- Remove the packaging material and any packaging and/or transportation braces (if available).
- Check to see if all items are supplied.
- Inspect the equipment and accessories for transport damage.
- If possible, please keep the packaging until the end of the guarantee period.

#### Danger!

The equipment and packaging material are not toys. Do not let children play with plastic bags, foils or small parts. There is a danger of swallowing or suffocating!

- Grass trimmer
- Additional handle
- Guard hood
- Blade plate
- Blade
- Battery pack

- Charger
- Original operating instructions
- Safety information

#### 3. Intended use

The equipment is designed for cutting lawns and grassed areas. It is not designed to be used for public facilities, parks, sports centers, along roadways, or in agriculture and forestry.

The operating instructions as supplied by the manufacturer must be kept and referred to in order to ensure that the equipment is properly used and maintained.

Important. This equipment must not be used for composting purposes (shredding) as this could result in injury or damage to property.

The equipment may be used only for the tasks it is designed to handle. Any other use is deemed to be a case of misuse. The user/operator and not the manufacturer will be liable for any damage or injuries of any kind resulting from such misuse.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

#### Caution!

#### Residual risks

Even if you use this electric power tool in accordance with instructions, certain residual risks cannot be rules out. The following hazards may arise in connection with the equipment's construction and layout:

- Lung damage if no suitable protective dust mask is used.
- Damage to hearing if no suitable ear protection is used.
- Health damage caused by hand-arm vibrations if the equipment is used over a prolonged period or is not properly guided and maintained.
- Injuries and material damage caused by flying parts.
- Cut injuries if suitable protective clothing is not worn.

#### 4. Technical data

Voltage	18 V d.c.
Speed no	8750 min <sup>-1</sup>
Cutting circle	Ø 24 cm
Protection	IPX0
Protection class	
Weight:	1.4 kg
Lithium-ion battery	
Voltage:	18 V DC
Capacity:	4.0 Ah
Number of cells:	10

#### **Battery charger**

Input voltage:	200-250 V~ 50-60 Hz
Output voltage:	20 V DC
Output current:	3.0 A
Protection class:	II / 🗖

#### Caution!

The equipment and the charger are allowed to be used only for the lithium-ion batteries of the Power-X-Change series!

#### Danger!

#### Sound and vibration

Sound and vibration values were measured in accordance with EN 62841.

Sound pressure level L <sub>DA</sub> :	74.5 dB(A)
Uncertainty K <sub>DA</sub> :	3 dB
Sound power level L <sub>wa</sub> :	
Uncertainty K <sub>wa</sub> :	1.92 dB
Guaranteed sound power level L	: 88 dB(A)

#### Wear ear-muffs.

The impact of noise can cause damage to hearing.

Total vibration values (vector sum of three directions) determined in accordance with EN 62841.

#### Handle

Vibration emission value  $a_h \le 2.5 \text{ m/s}^2$ K uncertainty = 1.5 m/s<sup>2</sup>

#### **Additional handle**

Vibration emission value  $a_h \le 2.5 \text{ m/s}^2$ K uncertainty = 1.5 m/s<sup>2</sup> The stated vibration emission levels and stated noise emission values were measured in accordance with a set of standardized criteria and can be used to compare one power tool with another.

The stated vibration emission levels and stated noise emission values can also be used to make an initial assessment of exposure.

#### Warning:

The vibration and noise emission levels may vary from the level specified during actual use, depending on the way in which the power tool is used, especially the type of workpiece it is used for.

#### Limit the operating time!

All stages of the operating cycle must be considered (for example, times in which the electric tools are switched off and times in which the tool is switched on but operates without load).

# Reduce noise generation and vibration to a minimum!

- Use only equipment that is in perfect condition.
- Maintain and clean the equipment regularly.
- Adapt your way of working to the equipment.
- Do not overload the equipment.
- Have the equipment checked if necessary.
- Switch off the equipment when not in use.
- Wear gloves.

## 5. Before using the equipment

The equipment is supplied without batteries and without a charger!

#### 5.1 Assembling the long handle (Fig. 3-5)

Gently press both locking knobs (Item 5) and insert the upper section of the handle (Item 6a) into the middle section of the handle (Item 6b). The locking knobs will audibly click into place. Put the middle section of the handle (Item 6b) and the lower section of the handle (Item 6c) together and screw them in place with two assembly screws (Item 10).

#### 5.2 Fitting the guard hood (Fig. 6-7)

Push the guard hood (Item 7) onto the mount on the motor housing as far as it will go and screw it securely in place with the mounting screw (Item 10).

#### 5.3 Fitting the blade plate (Fig. 8)

Insert the blade plate (Item 8) onto the motor shaft (Fig. 2 / Item 12) and secure it with the fastening screw (Item 11).

#### 5.4 Fitting the blade (Fig. 9-10)

Place the blade in the groove on the blade mount (Item 8a) and pull outwards.

**Danger!** Only original accessories must be used. Metal cutting elements are dangerous and not allowed.

# 5.5 Fitting the additional handle (Fig. 11)

Slide the additional handle (Item 3) onto the handle mount (Item A) until it latches into place.

#### 5.6 Installing the battery (Fig. 12)

Push the battery into the battery mount provided. The battery will be heard to click into place when it has been pushed fully in. To take out the battery, press the pushlock button (Item C) and remove the battery.

#### 5.7 Charging the battery (Fig. 13)

- Take the battery pack out of the equipment. Do this by pressing the side pushlock buttons.
- Check that your mains voltage is the same as that marked on the rating plate of the battery charger. Insert the power plug of the charger into the mains socket outlet. The green LED will then begin to flash.
- Insert the battery pack into the battery charger.
- In section "Charger indicator" you will find a table with an explanation of the LED indicator on the charger.

The battery pack can become a little warm during the charging. This is normal.

If the battery pack fails to charge, check:

- whether there is voltage at the socket outlet
- whether there is good contact at the charging contacts

If the battery pack still fails to charge, send

- the charging unit
- and the battery pack

to our customer service center.

To ensure that items are properly packaged and delivered when you send them to us, please contact our customer service or the point of sale at which the equipment was purchased.

When shipping or disposing of batteries and cordless tools, always ensure that they are packed individually in plastic bags to prevent short circuits and fires.

To ensure that the battery pack provides long service, you should take care to recharge it promptly. You must recharge the battery pack when you notice that the performance of the device drops. Never allow the battery pack to become fully discharged. This will cause it to develop a defect.

# 5.8 Battery capacity indicator (Fig. 14)

Press the switch for the battery capacity indicator (Item B). The battery capacity indicator (Item A) shows the charge status of the battery using 3 LFDs.

#### All 3 LEDs are lit:

The battery is fully charged.

#### 2 or 1 LED(s) are lit:

The battery has an adequate remaining charge.

#### 1 LED flashes:

The battery is empty, recharge the battery.

#### All LEDs blink:

The battery temperature is too low. Remove the battery from the equipment, keep it at room temperature for one day. If the fault reoccurs, this means that the rechargeable battery has undergone exhaustive discharge and is defective. Remove the battery from the equipment. Never use or charge a defective battery.

## 6. Operation

Please note that the statutory regulations governing noise abatement may differ from one location to another.

**Danger!** The guard hood must be fitted when carrying out work.

#### Each time before use, check the following:

- That the equipment is in perfect condition and that the safety devices and cutting devices are complete.
- That all screws are securely fastened.
- That all moving parts move smoothly.

#### 6.1 Switching the equipment on and off

#### 6.1.1 Switching on (Fig. 12)

Press the left or the right safety lock-off (Item 1) and the On/Off switch (Item 2). Once the tool is running, you can release the safety lock-off.

#### 6.1.2 Switching off

Release the On/Off switch.

#### 6.2 Practical tips

Practice all the work steps with the motor switched off and without the rechargeable battery before you start to use the equipment. Only ever cut grass that is dry. If the grass is long, the grass must be cut shorter in stages (Fig. 15).

Using a brush or similar, carefully remove all residual grass from the underside of the guard hood at regular intervals.

#### Different cutting methods

**Please note:** Even if done carefully, cutting around foundations, stone or concrete walls, etc. will result in above-normal wear on the cutting elements.

#### Trimming/mowing

Swing the trimmer from side to side in a scything motion. Always keep the cutting element parallel to the ground. Check the site and decide which cutting height you require. Guide and hold the cutting element at the required height to ensure that you cut evenly.

#### Low trimming

Hold the trimmer right in front of you at a slight angle so that the cutting element is above the ground and strikes the correct target. Always cut away from yourself. Never draw the string trimmer towards yourself.

# **Cutting along fences / foundations**

Approach wire mesh fences, plank fences, natural stone walls and foundations slowly so that you can cut close to them without striking the obstacle with the cutting element.

#### **Trimming around trees**

When trimming around tree trunks, approach slowly so that the cutting element does not strike the bark. Walk around the tree, cutting from left to right. Approach grass or weeds with the tip of the cutting element and tilt the tool forwards slightly.

Warning: Take extreme care during mowing work. When doing such work keep a distance of 30 meters between yourself and other people or animals.

#### Mowing

When mowing down to the ground you will cut all the vegetation. To do this, tilt the tool at an angle of 30° to the right. Place the handle in the required position. Remember the increased risk of injury to the user, onlookers and animals, and the danger of damaging property due to thrown objects (for example stones) (Fig. 16).

# Using the grass trimmer as an edge trimmer (Fig. 17-18)

To cut the edges of lawns alongside flower beds for example (vertical cutting), the grass trimmer can be converted into a lawn edge trimmer.

Gently press both locking knobs (Item 5) to release the lock and pull the upper section of the handle (Item 6a) slowly upward out of the middle section of the handle (Item 6b). Turn the handle-bar 180°. Gently press both locking knobs (Item 5) and fit the two sections of the handle together until the locking knobs audibly latch into place.

Return the handles to their original position in reverse order for use as a grass trimmer.

# 7. Cleaning, maintenance and ordering of spare parts

#### Danger!

Remove the rechargeable battery/batteries.

#### 7.1 Cleaning

- Keep all safety devices, air vents and the motor housing free of dirt and dust as far as possible. Wipe the equipment with a clean cloth or blow it down with compressed air at low pressure.
- We recommend that you clean the equipment immediately after you use it.
- Clean the equipment regularly with a damp cloth and some soft soap. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the equipment. Ensure that no water can get into the interior of the equipment. The ingress of water into an electric tool increases the risk of an electric shock.
- Use a brush to remove deposits from the sa-

fety guard.

#### 7.2 Maintenance

There are no other parts inside the equipment which require maintenance.

#### 7.3 Ordering spare parts

Please provide the following information on all orders for spare parts:

- Model/type of the equipment
- Article number of the equipment
- ID number of the equipment
- Spare part number of the required spare part For our latest prices and information please go to www.Einhell-Service.com

Spare blade set Art. No.: 34.057.38 Spare blade box Art. No.: 34.057.39

## 8. Disposal and recycling

The equipment is supplied in packaging to prevent it from being damaged in transit. The raw materials in this packaging can be reused or recycled. The equipment and its accessories are made of various types of material, such as metal and plastic. Defective components must be disposed of as special waste. Ask your dealer or your local council.

# 9. Storage

Remove the rechargeable battery/batteries. Store the equipment and accessories in a dark and dry place at above freezing temperature. The ideal storage temperature is between 5 and 30 °C. Store the electric tool in its original packaging.

#### 10. Transport

- Always carry the tool with one hand on the handle and the other on the additional handle.
   Do not carry the tool by the motor housing.
- Secure the tool against slipping if transporting it by car.
- If possible, use the original packaging for transportation.

# 11. Faults

The equipment does not work: Check that the battery is charged and whether the charging unit is working. If the equipment will not work in spite of the voltage supply being OK, please send it to the customer service address below.

# 12. Charger indicator

Indicator status		Explanations and actions		
Red LED Green LED				
Off	Flashing	Ready for use The charger is connected to the mains and is ready for use; there is no battery pack in the charger		
On	Off	Charging The charger is charging the battery pack in quick charge mode. The charging times are shown directly on the charger. Important! The actual charging times may vary slightly from the stated charging times depending on the existing battery charge.		
Off	On	The battery is charged and ready for use. (READY TO GO) The unit then changes over to gentle charging mode until the battery is fully charged. To do this, leave the rechargeable battery on the charger for approx. 15 minutes longer.  Action: Take the battery pack out of the charger. Disconnect the charger from the mains supply.		
Flashing	Off	Adapted charging The charger is in gentle charging mode. For safety reasons the charging is performed less quickly and takes more time. The reasons can be: - The rechargeable battery has not been used for a very long time The battery temperature is outside the ideal range. Action: Wait for the charging to be completed; you can still continue to charge the battery pack.		
Flashing	Flashing	Fault Charging is no longer possible. The battery pack is defective. Action: Never charge a defective battery pack. Take the battery pack out of the charger.		
On	On	Temperature fault The battery pack is too hot (e.g. due to direct sunshine) or too cold (below 0° C). Action: Remove the battery pack and keep it at room temperature (approx. 20° C) for one day .		

#### Disposal

Power tools, rechargeable batteries, accessories and packaging should be sorted for environmental-friendly recycling.

Do not dispose of power tools and batteries/rechargeable batteries into household waste!

#### Only for EU countries:

According to the Directive 2012/19/EU on waste electrical and electronic equipment and its transposition into national law, power tools that are no longer usable, and, according to the Directive 2006/66/EC, defective or drained batteries must be collected separately and disposed of in an environmentally correct manner.

If disposed incorrectly, waste electrical and electronic equipment may have harmful effects on the environment and human health, due to the potential presence of hazardous substances.

#### Only for United Kingdom:

According to The Waste Electrical and Electronic Equipment Regulations 2013 (SI 2013/3113) (as amended) and the Waste Batteries and Accumulators Regulations 2009 (SI 2009/890) (as amended), products that are no longer usable must be collected separately and disposed of in an environmentally friendly manner.

The reprinting or reproduction by any other means, in whole or in part, of documentation and papers accompanying products is permitted only with the express consent of the Einhell Germany AG.

Subject to technical changes

# **Service information**

We have competent service partners in all countries named on the guarantee certificate whose contact details can also be found on the guarantee certificate. These partners will help you with all service requests such as repairs, spare and wearing part orders or the purchase of consumables.

Please note that the following parts of this product are subject to normal or natural wear and that the following parts are therefore also required for use as consumables.

Category	Example
Wear parts*	Blade head, Blade plate, Line spool holder , Battery
Consumables*	Blade, Line, Line spool
Missing parts	

<sup>\*</sup> Not necessarily included in the scope of delivery!

In the effect of defects or faults, please register the problem on the internet at www.Einhell-Service.com. Please ensure that you provide a precise description of the problem and answer the following questions

- Did the equipment work at all or was it defective from the beginning?
- Did you notice anything (symptom or defect) prior to the failure? What malfunction does the equipment have in your opinion (main symptom)? Describe this malfunction.

# Warranty certificate

#### Dear Customer.

All of our products undergo strict quality checks to ensure that they reach you in perfect condition. In the unlikely event that this equipment develops a fault, please contact our service department at the address shown on this guarantee card. You can also contact us by telephone using the service number shown. Please note the following terms under which guarantee claims can be made:

- 1. These guarantee terms apply solely to consumers, i.e. natural persons, who do not want to use this product in connection with either their commercial or other self-employed activities. These guarantee terms regulate additional guarantee services which the undermentioned manufacturer promises to buyers of its new products in addition to their statutory rights of guarantee. Your statutory rights of guarantee are not affected by this guarantee. Our guarantee is free of charge to you.
- 2. The guarantee services cover only defects due to material or manufacturing faults on the new product which you have bought in the European Union from the undermentioned manufacturer and are limited to either the rectification of said defects or the replacement of the product, whichever we prefer. Please note that only equipment under the brand name "Professional" has been designed for use in commercial, trade or professional applications. For all other products the guarantee is invalidated if the equipment is used within the guarantee period in commercial, trade or industrial applications or for other equivalent activities.
- 3. Our guarantee does not cover:
  - Damage to the equipment caused by failure to comply with the installation/assembly instructions or by
    unprofessional installation; damage caused by failure to comply with the operating instructions (e.g.
    connection to the wrong mains voltage or current type); damage caused by failure to comply with the
    maintenance and safety regulations; damage caused by exposing the equipment to abnormal environmental conditions; damage resulting from poor care and maintenance.
  - Damage to the equipment caused by misuse or incorrect applications (e.g. overloading the equipment
    or using non-approved attachments or accessories); damage caused by foreign bodies (e.g. sand,
    stones, dust, ....) getting inside the equipment. Damage in transit; damage caused by force or external
    influences (e.g. by dropping the equipment).
  - Damage to the equipment or parts of the equipment which is owed to use-related, normal or otherwise
    natural wear. For example, batteries and battery packs are manufactured with a cycle limit for designrelated reasons. Wear is negatively influenced in particular by load demands and charging speeds as
    well as exposure to heat, cold, vibration and impact.
- 4. The guarantee is valid for a period of 2 years starting from the purchase date of the equipment. Guarantee claims must be submitted before the end of the guarantee period and within two weeks of the defect being noticed. No guarantee claims will be accepted after the end of the guarantee period. The original guarantee period remains applicable to the equipment even if repairs are carried out or parts are replaced. In such cases, the work performed or parts fitted will not result in an extension of the guarantee period, and no new guarantee will become active for the work performed or for any replacement parts fitted. This also applies if on-site service is used.
- 5. To assert your guarantee claim, register the defective equipment at: www.Einhell-Service.com. You will need to provide proof of purchase of the new item of equipment. Equipment returned without such proof or without a rating plate are excluded from the guarantee services because of the lack of traceability. If the defect is covered by our guarantee, then either the item in question will be repaired immediately and returned to you or we will send you a new replacement.
- If you have taken the equipment with you to a different EU country than where you bought it, we will arrange for a local service partner to provide the guarantee services. If you take the equipment outside the EU, the guarantee will not apply.

Of course, we are also happy to offer a chargeable repair service for any defects which are not covered or no longer covered by the scope of this guarantee. To take advantage of this service, please send the equipment to our service address. We draw attention to the restrictions of this guarantee concerning wear parts, consumables and missing parts as presented in the service information included in this operating manual.
