

Electric welding transformer PES 160 F

Art.-No.: **15.460.38**

Bar code: 4006825538199

Sales unit: 1 pc

Electric welding transformers are especially used for joining by welding of flat-iron, angle iron, tubes or similar material. One great advantage of electric welding is, that the materials might not be warmed up and welding can be started directly at the requested position. Work pieces with various strength can also be welded with each other without any problems. The electric welding transformer can be operated with 230 V and 400 V nominal voltage. You can regulate the nominal voltage with a rotary switch. The Electric welding transformer is for mobile application optimally qualified.

Features:

- Earth terminal (1)
- Electrode support (2)
- Continuous adjustable welding current (3)
- Main cable 400 V (4)
- Main cable 230 V (5)
- Rotary switch for nominal voltage 230 V / 400 V (6)
- Thermal cut-out with control lamp (7)
- Carrying belt (8)
- Complete with welding accessories (9)

Technical data:

- I_{kmax} : 250 A
- Electrodes: \varnothing 2.0 – 4.0 mm
- No-load voltage: 48 V
- Mains: 230 V / 400 V ~ 50 Hz
- Fuse: 16 A
- Weight: 23.5 kg
- Packing dimensions: 490 x 280 x 360 mm

with turbo cooling
