Refrigerant

R410A

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 2080. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 2080 times higher than 1 kg of CO<sub>2</sub>, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

EER

2.61

Energy efficiency class

A

Energy consumption based on standard test results.

0.80 kWh per 60 minutes

Actual energy consumption will depend on how the appliance is used and where it is located.

Cooling capacity in kW
