MAINTENANCE

WARNING! BEFORE CLEANING OR CARRYING OUT ANY MAINTENANCE PROCEDURE, ENSURE THAT THE BATTERIES HAVE BEEN REMOVED.

Cleaning

- Keep the ventilation slots of the tool clean at all times to ensure efficient operation.
- After each use, blow air through the tool housing to ensure it is free from all dust, dirt, etc. Build up of dust or dirt particles may cause the tool to overheat and shorten the life of the tool.
- If the housing of the tool requires cleaning, do not use solvents. Use of a cloth only is recommended.
- Never allow any liquid to get inside the tool, never immerse any part of the tool into liquid.

Cleaning the Dust Canister

1. Position the dust canister above a waste bin. Press the release button (a) down to open the canister bin flap (b).

2. Once it's empty, click the canister bin flap back shut until it snaps into place.

Cleaning the main filter

Never use the equipment without filters. Always make sure that the filters are securely fitted. Clean the filters regularly to ensure optimum suction performance.

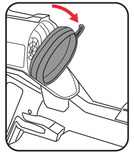

1. Press the release button

2. Take out the dust canister.

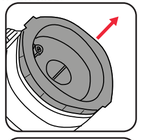

3. The main filter can be found fitted inside the equipment housing. It can be removed by pulling on the tab. Gently tap on the filter or clean it with compressed air at low pressure.

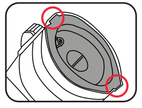

Cleaning the filter unit with metal mesh filter

1. The filter unit with metal mesh filter is fitted inside the dust canister and can be removed for cleaning when needed. Use a soft brush or compressed air at low pressure to clean the filter element.

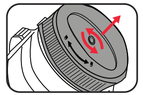

2. Refit the filter to the dust canister, ensuring the two tabs on the filter sit flush within the notches.

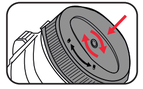

Cleaning the exhaust filter

The exhaust filter can be found inside the slotted vent cover.

1. To remove the exhaust filter, twist it to the left (anticlockwise). Gently tap on the filter or clean it with a dry brush.

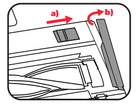

2. To reinsert it, twist the exhaust filter clockwise until it latches in place.

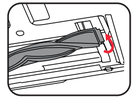

Cleaning or replacing the brush rollers

1. Slide the release button (a) sideways to disengage the retaining latch and flip the retaining latch upwards (b) to free the brush drum.

2. Carefully take out the brush drum.

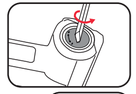

3. Remove any dirt, hair and fixbres with the supplied cleaning tool from the brush. Reinsert the brush drum and flip the retaining latch back into place until you hear it click.

Note: Make sure that the brush roller latches in place correctly.

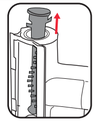

Cleaning the small motorized brush

1. Unscrew the cap with a flat screwdriver or coin.

2. Lift the brush drum up and out, then use the supplied cleaning tool to remove any hair, fibres and dirt from the drum.

3. Reinsert the brush drum and secure it back into position with a flat screwdriver or coin..

Storage

When not in use, the tool should be stored in a dry, frost free location, keep out of children's reach.

Note: Ozito Industries will not be responsible for any damage or injuries caused by repair of the tool by an unauthorised person or by mishandling.

TROUBLESHOOT

HEPA filter: When the light comes on, please follow up the filter clean process. If the issue persist, filter replacement is required.

Brush roller: When the indicator is lit, it means the roller brush is jammed. Please clean up brush roller with supplied cleaning tool.

Warning light: Airway blocked. Please clear any obstructions and clean the filter.

⚠ ELECTRICAL SAFETY

WARNING! When using electric tools basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury.

- Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool. Save these instructions and other documents supplied with this tool for future reference.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- This appliance is compatible and only to be used with all batteries & chargers from the Ozito PXC range. Refer to the PXC battery and charger manuals for information regarding charging, use and storage.
- WARNING! Always remove the battery from the tool:
  - when the batteries are to be charged,
  - when the tool is left unattended,
  - when the tool is being checked, cleaned, or having maintenance work done,
  - when the tool is to be stored,
  - or if the tool vibrates abnormally.
- Do not combine different types of batteries or new and used batteries.
- Do not use modified or damaged batteries.

⚠ GENERAL POWER TOOL SAFETY WARNINGS

WARNING! **Read all safety warnings, instructions, illustrations and specifications provided with this power tool.** Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety

a) **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.

b) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.

c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) Electrical safety

a) **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.

b) **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.

c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.

d) **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.

e) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

3) Personal safety

a) **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.

b) **Use personal protective equipment. Always wear eye protection.** Protective equipment such as a dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.

c) **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.

f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.

g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

h) **Do not let familiarity gained from frequent use of tools allow you to become complacent and ignore tool safety principles.** A careless action can cause severe injury within a fraction of a second.

4) Power tool use and care

a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.

b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) **Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.

e) **Maintain power tools and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

h) **Keep handles and grasping surfaces dry, clean and free from oil and grease.** Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.

5) Battery tool use and care

a) **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.

b) **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.

c) **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.

d) **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

e) **Do not use a battery pack or tool that is damaged or modified.** Damaged or modified batteries may exhibit unpredictable behaviour resulting in fire, explosion or risk of injury.

f) **Do not expose a battery pack or tool to fire or excessive temperature.** Exposure to fire or temperature above 130 °C may cause explosion.

g) **Follow all charging instructions and do not charge the battery pack or tool outside the temperature range specified in the instructions.** Charging improperly or at temperatures outside the specified range may damage the battery and increase the risk of fire.

6) Service

a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

b) **Never service damaged battery packs.** Service of battery packs should only be performed by the manufacturer or authorized service providers.

⚠ STICK VACUUM SAFETY WARNINGS

When using the equipment, a few safety precautions must be observed to avoid injuries and damage. Please read the complete operating manual with due care. Keep this manual in a safe place so that the information is available at all times. If you give the equipment to any other person, give them these operating instructions as well.

We cannot accept any liability for damage or accidents which arise due to a failure to follow these instructions and the safety information.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

The appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure they do not play with the appliance.

- **Do not leave appliance unattended when connected to the power supply. Remove battery when not in use and before servicing and cleaning.**
- **To avoid electric shock, do not expose to rain. Store indoors.**
- **Never use in the presence of explosive liquids, vapours or explosive dust – such as coal or grain.**
- **Use only manufacturer's recommended attachments and consumables.**
- **Never modify the cleaner in any way - this is dangerous and will invalidate the warranty.**
- **Do not use cleaner without the filter in place.**
- **If motor sound becomes higher pitched always check for the following:**
  - **Blocked hose or accessory.**
  - **Blocked filter.**
  - **Full dust canister.**
- **When lifting the unit, always lift it with the handle or under rim of bucket. Beware of excess weight.**
- **Children should be supervised to ensure that they do not play with the appliance.**
- **The appliance is not suitable for the vacuuming of combustible, explosive or harmful substances.**
- **Do not aim the hose at other persons or animals.**
- **Never pick up asbestos or asbestos dust.**
- **Wood dust and shavings in a confined area can give rise to fire or an explosion.**
- **Guard against possible ignition sources.**
- **Do not pick up any material that is burning or smouldering such as metal grinding dust, cigarette ends, matches etc.**
- **Always switch the unit off before changing attachments, filters and emptying the tank.**
- **Always check that the filter is clear and not blocked. Keep all openings clear of any blockages.**
- **The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.**
- **Do not vacuum dry matter without the filter assembled.**
- **Do not point LED at eyes of persons or animals.**

WARRANTY

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law.

Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

5 YEAR REPLACEMENT WARRANTY

Your Product is guaranteed for a period of 60 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. **Lithium Ion batteries and chargers are covered by a 36 month warranty** and are excluded from the warranty extension. Warranty excludes consumable parts.

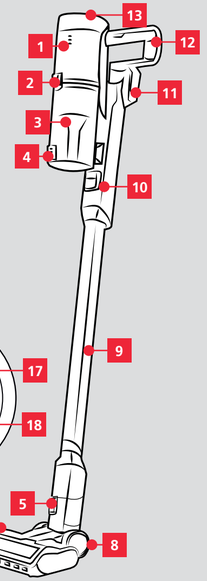

OZITO 25 Fox Drive, Dandenong South, VIC 3175, Australia.

5 YEAR
REPLACEMENT WARRANTY

SETUP & PREPARATION

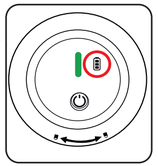

1. FITTING THE BATTERY

Installing The Battery Pack

1. Slide the battery into the tool base until it clicks into place.

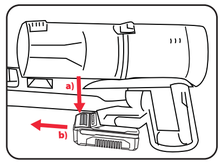

Note: The battery percentage can also be seen on the LED display once the tool is switched on. The battery indicator flashes when the battery is running low.

Removing The Battery Pack

1. Hold down the battery release button (a) and slide the battery out (b).

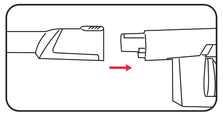

2. ASSEMBLY

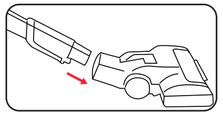

WARNING! ENSURE THE TOOL IS SWITCHED OFF AND THE BATTERY IS REMOVED BEFORE PERFORMING ANY OF THE FOLLOWING TASKS.

Fitting the Accessories

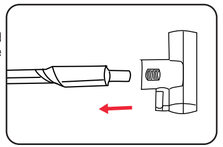

1. Fit the vacuum head into the suction tube until it latches in place with a click.

2. Fit the motor brush into the suction tube until it latches in place with a click.

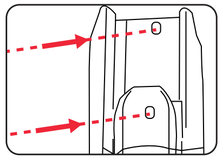

Note: The small motorized brush, 2-in-1 Crevice nozzle with brush and flexible crevice nozzle can be attached directly to the vacuum head or to the suction tube.

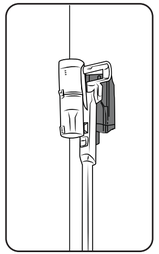

WARNING! MAKE SURE THAT NOTHING IS JAMMED BETWEEN THE EQUIPMENT CONNECTIONS.

Fitting the Wall Mount

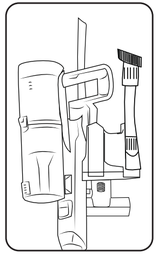

1. Align the wall mount to the screws (2 wall plugs, and 2 screws included) and fix it to the wall.

Note: The holder provides a practical means of storing the stick vacuum after use.

Note: All accessories can be stored on the wall mount. The small motorised head can be attached down the bottom of wall mount. and the two crevices can be stored on the sides.

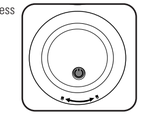

OPERATION

3. CONTROLS

WARNING! DO NOT PUT HAND OR FINGERS NEAR MOTORIZED CLEANING HEAD WHILE VACUUM IS RUNNING.

On/Off Switch

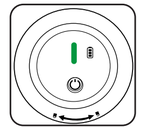

1. Press the button to switch the tool on and press it again to switch it off.

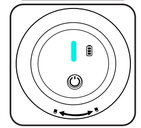

Modes

The vacuum has 3 Mode Settings:

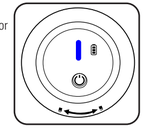

ECO (GREEN):
Suitable for hard floors and low-pile carpets or when a longer running time is desired.

NORMAL (TURQUOISE):
Balanced suction power for daily cleaning.

BOOST (BLUE):
Maximum suction power for high-pile carpets or especially thorough cleaning.

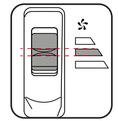

Speed

The vacuum has 3 Speed Settings:
To choose a speed, move the switch to align with your desired speed setting.

ECO:

NORMAL:

BOOST:

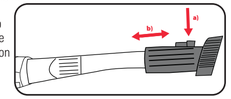

4.USAGE

WARNING! NEVER USE THE EQUIPMENT WITHOUT FILTERS ALWAYS MAKE SURE THAT THE FILTERS ARE SECURELY SEATED!

Suction Nozzles/ Brushes

Flexible Crevice Nozzle:
It is suitable for vacuuming corners, edges and other areas that are difficult to access.

2-in1 Crevice Nozzle with Brush:
It combines a crevice nozzle and an adjustable brush. The brush can be moved up and down along the nozzle.
To change positions, press the release button at the top of the nozzle (a) and slide the brush into the desired position until it latches into place.(b)

Motorized Cleaning Head:
It is ideal for thoroughly cleaning hard floors and carpets. The rotating brush roll effectively removes dirt and adjusts to different floor surfaces.

Small-motorized brush:
It is perfect for picking up animal hair, fibres and ground-in dirt on upholstered furniture, car seats and other textile surfaces. The rotating brush drum ensures thorough cleaning on small surfaces.

Note: To achieve the best suction performance, empty the dust canister each time after you use the cleaner or as soon as the dust reaches the MAX line.
