RT-AC 480/100/10 D

Air Compressor

The 2 cylinders, the powerful 400 volt engine and the belt drive cares for a high intake capacity. The 10 bar of the large 100 litre vessel allows a variety application spectrum and by using of high-grade components a very long runtime is secured. By quick couplings the vessel pressure or a lower regulated working pressure can be taken out. For the regulated working pressure 2 quick couplings are available. Regulated compressed air is cleaned by a filter pressure reducer with metal housing from condensation, what for example with paint work is necessary. Due to large wheels and guide rollers the compressor is mobile.
