Safety Instructions Drag, Crosscut and Mitre Saw

Please read and save these instructions.

7

Ⓞ Note the instructions for use!

Ⓞ Caution! Risk of injury! Do not reach into the running saw blade.

Ⓞ Wear a breathing mask!

Ⓞ Wear ear muffs!

Ⓞ Wear safety goggles!

Ⓞ Wear safety gloves

SAFETY INSTRUCTIONS

Warning! When using electric tools, basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury, in-cluding the following.

Read all these instructions before attempting to operate this product and safe these instructions.

1. **Keep work area clean**
 - Cluttered areas and benches invite injuries.
2. **Consider work area environment**
 - Don't expose power tools to rain. Don't use power tools in damp or wet locations. Keep work area well lit. Don't use power tools in presence of flammable liquids or gases.
3. **Guard against electric shock**
 - Prevent body contact with grounded surfaces (e.g. pipes, radiators, ranges refrigerators).
4. **Keep children away**
 - Do not let visitors contact tool or extension cord. All visitors should be kept away from work area.
5. **Store idle tools**
 - When not is use, tools should be stored in dry, high, or locked-up place, out of the reach of children.
6. **Don't force tool**
 - It will do the job better and safer at the rate for which it was intended.
7. **Use right tool**
 - Don't force small tools or attachments to do the job of heavy duty tool. Don't use tools for purposes not intended: for example, don't use circular saw for cutt- ing tree limbs or logs.
8. **Dress properly**
 - Do not wear loose clothing or jewelry. They can be caught in moving parts. Rubber gloves and nonskid footwear are recommended when working outdoors. Wear protective nair covering to contain long hair.
9. **Use safety glasses**
 - Also use face or dust mask if cutting operation is dusty.
10. **Don't abuse cord**
 - Never carry tool by cord or yank it to disconnect it from receptacle. Keep cord from heat, oil and sharp edges.
11. **Secure work**
 - Use clamps or a vise to hold work. It's safer than using your hand and it frees both hands to operate tool.
12. **Don't overreach**
 - Keep proper footing and balance at all times.
13. **Maintain tools with care**
 - Keep tools sharp and clean for better and safer performance. Follow instructions for lubricating and changing accessories. Inspect tool cords periodically and, if damaged, have repaired by authorized service facility. Inspect extension cords periodically and replace if damaged. Keep handles dry, clean and free from oil and grease.
14. **Disconnect tools**
 - When not in use, before servicing, and when changing accessories such as blades, bits and cutters.
15. **Remove adjusting keys and wrenches**
 - Form the habit of checking to see that keys and adjusting wrenches are removed from tool before turning it on.
16. **Avoid unintentional starting**
 - Don't carry plugged-in tool with finger on switch. Be sure switch is off when plugging in.
17. **Outdoor use extension cords**
 - When tool is used outdoors, use only extension cords intended for use outdoors and so marked.
18. **Stay alert**
 - Watch what you are doing. Use common sense. Do not operate tool when you are tired.
19. **Check damaged parts**
 - Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced by an authorized service center unless otherwise indicated elsewhere in this instructions manual. Have defective switches replaced by an authorized service center. Do not use tool if switch does not turn it on and off.
20. **Warning**
 - The use of any other accessory or attachment other than recommended it this operating instruction or the Einhell catalog may present a risk of personal injury.
21. **Have your tool repaired by an expert**
 - This electric appliance is in accordance with the relevant safety rules repairing of electric appliances may be carried out only by experts otherwise it may cause considerable danger for the user.
22. **Connect the dust extraction device**
 - Wherever there are facilities for fitting a dust extraction system, make sure it is connected and used.

GB

Special safety instructions

1. Safety actions

- Blades that are deformed or cracked must not be used.
- If the table insert is worn, replace it.
- Only use saw blades that are recommended by the manufacturer, comply with EN 847-1 and bear a warning note. When replacing the saw blade ensure that the cutting width is no smaller and the basic blade thickness of the saw blade is no larger than the thickness of the splitter.
- Make sure that the chosen blade is suitable for the material that is to be cut.
- If necessary, wear suitable personal protection equipment. This could consist of:
 - Ear plugs to prevent the risk of damaging your hearing;
 - A breathing mask to avoid the risk of inhaling hazardous dust.
 - Always wear gloves when handling saw blades and rough materials. Whenever practicable, saw blades must be carried in a container.
- The following can have an influence on dust development:
 - Worn, damaged or cracked saw blades
 - Recommended capacity of the vacuum extraction system: 20 m/s
 - Proper guidance of the workpiece
- Blades made of high-alloy high-speed steel (HSS) must not be used.
- Keep the push stick or handle for a push block at the machine at all times, even when you are not using them.

2. Maintenance and service

- The following conditions can have an influence on noise impact on the operator:
 - Type of sawblade (e.g. saw blades designed to reduce noise development)
 - Material of the workpiece
 - The force with which the workpiece is pushed against the sawblade
- Faults on the machine or its guards, safety devices and blade must be reported to the person in charge as soon as they are discovered.

3. Safe operation

- Select a suitable blade for the material you wish to saw.
- Never use the drag, crosscut and miter saw to cut any materials other than those specified by the manufacturer.
- Use only the transport devices to move the machine. Never use the guards for handling or moving the machine.
- Use the saw only if it is in perfect condition and properly maintained.
- When cutting miters, make sure that the device for swiveling the arm is fastened securely.
- The floor around the machine must be level, clean and free of loose particles, such as chips and cutting residues.
- Make sure the workplace and the room are sufficiently illuminated.
- The operator must receive proper training in the use, adjustment and operation of the machine.
- Only use properly sharpened saw blades. Do not exceed the maximum speed specified on the blade.
- Be sure to only use spacers and spindle rings specified by the manufacturer as suitable for the intended purpose.
- If the machine is equipped with a laser, this laser may not be replaced by a different type of laser. Repairs may only be carried out by the manufacturer of the laser or one of his authorized agents.
- Do not remove any cutting residues or other parts of workpieces from the cutting zone while the machine is running and the saw unit is not at rest.
- Make sure that the machine is always secured on a workbench or a table if at all possible.
- Support long workpieces (e.g. with a roller table) to prevent them sagging at the end of a cut.

4. Additional instructions

- Always pull the plug out of the power socket before adjusting or servicing the machine.
- Give these safety regulations to all persons who work on the machine.
- Do not use this saw to cut fire wood.
- Caution! Hands and fingers may be injured on the rotating saw blade.
- Before you use the machine for the first time, check that the voltage marked on the rating plate is the same as your mains voltage.

- If you need to use an extension cable, make sure its conductor cross-section is big enough for the saw's power consumption. Minimum cross-section: 1.5 mm².
- If you use a cable reel, the complete cable has to be pulled off the reel.
- Never carry the saw by its cable.
- Do not leave the saw in the rain and never use it in damp or wet conditions.
- Provide good lighting.
- Never saw near combustible liquids or gases.
- Wear suitable work clothes! Loose garments or jewellery may become caught up in the rotating saw blade.
- Operators have to be at least 18 years of age. Trainees of at least 16 years of age are allowed to use the machine under supervision.
- Keep children away from the machine when it is connected to the power supply.
- Check the power cable. Never use a faulty or damaged power cable.
- Keep your workplace clean of wood scrap and any unnecessary objects.
- Persons working on the machine should not be distracted.
- Note the direction of rotation of the motor and saw blade.
- After you have switched off the motor, never slow down the saw blade by applying pressure to its side.
- Fit only blades which are well sharpened and have no cracks or deformations.
- The machine is to be operated only with tools which conform with EN 847-1: 2003.
- Faulty saw blades have to be replaced immediately.
- Never use saw blades which do not comply with the data specified in this manual.
- Make sure that the arrow on the saw blade complies with the arrow marked on the machine.
- Make certain that the saw blade does not touch the rotary table in any setting. To do so, pull out the power plug and tilt the saw blade by hand into the 45° position and the 90° position. If necessary, re-adjust the saw head as described in Section C/F.
- It is imperative to make sure that all the devices used to cover the saw blade are in good working order.
- Never wedge the hinged guard hood in open position.
- Never dismantle the machine's safety devices or put them out of operation.
- Damaged or faulty safety devices have to be replaced immediately.
- Never cut workpieces which are too small to hold securely in your hand.
- Do not place your hands in awkward positions where one or both may slip suddenly and touch the saw blade.
- When working with long workpieces, use an additional support (table, stand, etc.) to prevent the machine from tipping over.
- Always clamp round workpieces such as dowel rods etc. with suitable devices.
- There must be no nails or other foreign bodies in that part of the workpiece you want to cut.
- Always stand to the side of the saw blade when working with the saw.
- Never load the machine so much that it cuts out.
- Always press the workpiece firmly against the table and the stop rail to prevent it from wobbling or twisting.
- Make sure that off-cuts can be removed from the side of the saw blade. If not, they may catch on the saw blade crown and be catapulted into the surrounding area.
- Never saw several workpieces simultaneously.
- Never remove loose splinters, chips or jammed pieces of wood when the saw blade is running.
- To rectify faults or remove jammed pieces of wood, always switch off the machine first. - Pull out the power plug!
- Conversions, adjustments, measurements and cleaning jobs are to be performed only when the motor is switched off. - Pull out the power plug!
- Before you switch on the machine, check that all wrenches and adjustment tools have been removed.
- When you leave your workplace, switch off the motor and pull out the power plug.
- Electric installation work, repairs and maintenance are to be carried out only by specialists.
- All guards and safety devices have to be refitted immediately after completion of any repairs or maintenance.
- It is imperative to observe the manufacturer's safety, operating and maintenance instructions as well as the dimensions quoted in the technical data.
- It is imperative to observe the accident prevention regulations in force in your area as well as all other generally recognized rules of safety.
- Note the information published by your profes-

GB

sional associations.(VBG7)

- Switch on the dust extraction system each time you use the machine.
- The machine may be used in closed rooms only in conjunction with a suitable vacuum extraction system.
- The circular cross-cut must be connected to a 230 V socket-outlet with a minimum 10 A fuse.
- Never use light-duty machines for heavy-duty work.
- Never use the cable for any purpose other than that for which it is intended!
- Adopt a firm standing position and keep your balance at all times.
- Check the tool for signs of damage!
- Before you carry on using the tool it is imperative to check that its safety devices and any slightly damaged parts are working properly and in the way intended.
- Check that the moving parts work properly and do not jam or whether any of the parts are damaged. All parts must be fitted correctly and satisfy all conditions for the tool to work properly.
- Unless otherwise stated in these instructions, damaged safety devices and parts must be repaired or replaced by experts in an approved specialist workshop.
- Have damaged switches replaced by a customer service workshop.
- This tool complies with the pertinent safety regulations. Repairs are to be carried out only by qualified electricians using original replacement parts. The user may suffer an accident if this condition is not observed.
- The machine is to be operated only with tools which conform with EN 847-1:2003.
- Pull out the power plug and twist the blade with your hand into the 45° and 90° positions in order to make sure that the blade does not touch the turntable in any position. If necessary, readjust the saw head.
- If the table insert is worn, replace it.
- Never use blades made of high-speed steel (HSS).
- When cutting miters, make sure that the device for swiveling the arm is fastened securely.
- Be careful when working in vertical mode.
- Caution: Take extra care when making double miter cuts!
- Do not overload your tool.
- Wear safety goggles.
- Use a dust mask when working on dusty jobs
- Check the tool cable/extension cable for damage.

- Always wear gloves when handling saw blades

Do not lose these safety instructions.
