NEW GENERATION

The TKS 18/250 WS circular bench saw has been designed for stationary and mobile application. The easy-to-install table extensions provide a large work surface where the longitudinal stop can be used across the entire width. The TKS 18/250 WS has been designed for multi-purpose applications: ripping and cross-cuts of lumber, chipboard, plywood, multiplex board, veneered board and plastics. Thanks to its V-belt drive the table saw is very low-noise and smooth running. Its compact design, ease of handling during transport and its powerful performance make ideal for outdoor use, e.g. at construction sites and for interior decorating work. The saw can be tilted to 45° for mitre cuts. The sturdy under-frame turns the circular bench saw into a sturdy stand-alone saw which can be used at optimum working heights.
