

# HES 200 Electric Welding Machine

Art.-No. 15.490.41

Electric welding transformers are especially suitable for joining by welding of flat-iron, angle iron, tubes or similar material. One great advantage of electric welding is that the materials might not be warmed up and welding can be started directly at the requested position. Work pieces with various strength can also be welded with each other without any problems. To simplify the welding current adjustment the unit is equipped with a colour code system.

## Features

- Continuously adjustable welding current (1)
- Colour coding for welding current regulation (2)
- Thermal cut-out with control light (3)
- Earth terminal (4)
- Electrode holder (5)
- Welding shield (6)
- Produced to Europe standard EN 60974-1
- Adaptor cable (7)
- Mobile

## Technical data

- |                        |                    |
|------------------------|--------------------|
| ■ Mains:               | 230/400 V ~ 50 Hz  |
| ■ Fuse:                | 16 A               |
| ■ Welding current:     | 57 – 200 A         |
| ■ Weldable electrodes: | Ø 1.6 – 4 mm       |
| ■ Idle speed:          | 48 V               |
| ■ Net weight:          | 22.3 kg            |
| ■ Gross weight:        | 23.5 kg            |
| ■ Packing dimensions:  | 465 x 265 x 355 mm |
| ■ Bar code:            | 4006825 550368     |
| ■ Sales unit:          | 1 pc               |
