

Extremely wide cuts without a hitch!

Einhell®

NEW GENERATION

The KGSZ 4300 UG sliding cross-cut and mitre table saw for easy, precise and smooth cutting of wood parts.

The saw even allows double mitre cuts thanks to its tilting and swivelling motor head. **For increased cutting precision, the saw has been equipped with a laser function, i.e. a laser beam is projected onto the section plane of the workpiece. The serially supplied base frame allows working at optimum working heights.** Thanks to its sliding function, the saw can make cuts up to 430mm wide and is therefore ideal for cutting wide panels and laminate floorboard in one go.
