

Pond Pump TP 4300

Art.-No.: 41.723.30

Bar code: 4006825516319

Sales unit: 6 pcs

This powerful submersible pond pump will help you in obtaining good water quality, by maintaining the right amount of oxygen in the water. It will also make an eye-catching feature in your garden pond. The pump is designed for permanent use under water. A great deal of attention has been given to the maximum output with an economical current consumption. The pump is powered by an oil-less motor with the stator completely sealed and a water-cooled permanent magnet rotor. The housing is made of impact resistant plastics.

Features:

- Telescopic fountain pipe and steps fountain (1)
- flow control for fountain (2)
- Carrying handle (3)
- large push on foot with 4 suction cups (4)
- Suction filter with BIOCELL-filter insert (5)
- Connector for waterspout (6)
- flow control for waterspout (7)
- incl. steps fountain and foaming fountain (8)
- 10 mtr mains cable with shock-proof plug (without figure)
