The Full Boar Petrol Wood Chipper is ideal for shredding garden material such as trees, branches, hedge cuttings, leaves and general woody garden material. It is best suited for green branches up to 50mm diameter and dry branches up to 30mm diameter.

Features include a quality Briggs & Stratton 6.5HP engine with OHV technology, which provides optimized performance that delivers longer engine life and improved fuel economy. With the belt driven twin blade cutting system and large hopper you can quickly and efficiently turn large piles of garden waste into smaller manageable mulch. Other features include a hinged hopper and discharge chute, this allows tool-less access to the blades for quick and easy cleaning.

A transport handle and pneumatic wheels makes the chipper easy to manoeuvre, while the adjustable discharge chute allows the mulch to be collected into a wheelie bin or collection cart for easy disposal or for later use.
