

Pond Pump TP 950

Art.-No.: **41.723.10**

Bar code: **4006825516289**

Sales unit: **12 pcs**

This powerful submersible pond pump will help you achieve good water quality, by maintaining the right amount of oxygen in the water. The pump is designed for permanent use under water. A great deal of attention has been given to the maximum output with an economical current consumption. The pump is powered by an oil-less motor with the stator completely sealed and water cooled permanent magnet rotor. The housing is made of impact resistant plastics.

Features:

- Telescopic fountain pipe and steps fountain (1)
- Large push-on foot with 4 suction cups (2)
- Suction filter with BIOCELL-filter insert (3)
- incl. steps fountain and bell fountain (4)
- 10 mtr mains cable with shock-proof plug (without figure)
